Invitation: FFS CSM discussion (3): Human-Eco Receptors  
Tue 11/09/2010 10:00 AM - 12:00 PM

Chair: Alice Yeh/R2/USEPA/US

Location: Room 1922B

Alice Yeh has invited you to a meeting. You have not yet responded.

Required: basso.ray@epa.gov, naranjo.eugenia@epa.gov

Optional: butler.elizabeth@epa.gov, vaughn.stephanie@epa.gov

We had talked about the following approach for developing the FFS CSM (or revising it):

- 1) Alice to put together outline of CSM.
- 2) Ray, Eugenia, Alice (with Stephanie & Liz if they want to participate) to discuss contents of each chapter of CSM.
- 3) Outline & contents of CSM to be sent to Louis Berger & HydroQual (& Battelle if appropriate) for filling

in the blanks and making it into one document.

The FFS CSM that we want will be about 30 pages long. All other data & analyses will go in appendices.

So attached is a draft proposed outline for the CSM - this is pretty much what the RI/FS Guidance & Contaminated Sediment Guidance say should be in a CSM. Please feel free to edit.

Let's get together to discuss what should be in each chapter. Please let me know your availability over the next 4 weeks - I'd like to schedule one two-hour session every week.

- 1) Week of Oct 25-29: Sources of Contaminants of Concern
- 2) Week of Nov 1-5: Contaminant Transport Pathways
- 3) Week of Nov 8-12: Human and Ecological Receptors
- 4) Week of Nov 15-19: Introduction and Review whole document to see if missing anything
